

Document Extraction Foundation

Sample PDF for Testing

Overview:

The Document Extraction Foundation provides a universal public document extraction infrastructure for various document types.

Key Features:

- Local PDF text extraction
- HTML content extraction
- Plain text processing
- Markdown parsing
- Document hash computation
- Quality assessment

Supported Document Types:

- PDF (.pdf) - Portable Document Format
- HTML (.html, .htm) - HyperText Markup Language
- Text (.txt) - Plain text files
- Markdown (.md, .markdown) - Markdown documents

Quality Assessment:

Documents are assessed for extraction quality:

- High: More than 5000 characters
- Medium: Between 1000 and 5000 characters
- Low: Less than 1000 characters
- Empty: No text extracted

Use Cases:

This module can serve:

- CNINFO announcement PDFs
- HKEX announcement PDF metadata
- SEC filing exhibits
- Company IR presentations
- Public whitepapers
- Industry reports
- Policy documents
- User-provided local documents

Disclaimer:

This module provides infrastructure only.

Business logic remains with the consuming system.
